**Dear Fouad:**

(1) Many thanks for your msg (**ATTACHMENT I**).

(2) Your following paper is excellent, impressive and inspiring — though it is embarrassing to see my name in its title;

Dr. Fouad M. EL-Harazin "**In Global Peace and Global University System and Prof. Dr. Takeshi Utsumi**"  
<<http://tinyurl.com/ywej26>>

You wanted this paper to go along with;

Takeshi Utsumi, P. Tapio Varis, and W. R. Klemm  
"**Creating Global University System**"  
<http://tinyurl.com/sfqm7>

(3) I am particularly delighted to find the following three words in your write-up;

(a) Truth, (b) Goodness, and (c) Beauty.

Kitaro Nishida, world renowned Japanese philosopher, once said that those three words are the essence of the Japanese culture. BTW, Edward Teller, the inventor of hydrogen bomb which was dropped on Nagasaki <[http://en.wikipedia.org/wiki/Edward\\_Teller](http://en.wikipedia.org/wiki/Edward_Teller)>, once mentioned of those words in the New York Times Magazine, too.

I then made a comparison with the counter thoughts of Western culture as <Six Great Thoughts of East and West.pdf>  
<<http://tinyurl.com/vuozdk>>;

## Six Great Thoughts of East and West

East	West
Truth	Justice
Goodness	Equality
Beauty	Freedom

And see another following comparison <Comparison of Eastern and Western Cultures\_without note.pdf> <<http://tinyurl.com/2ehv46>>;

(4) The metaphor on the interaction between those two are <<http://tinyurl.com/vplps>>;

#### A Metaphor

Through SCI conferences, we are trying to relate the **analytic** thinking required in **focused** conference sessions, to the **synthetic** thinking, required for analogies generation, which calls for **multi-focus** domain and **divergent** thinking. We are trying to promote a synergic relation between analytically and synthetically oriented minds, as it is found between left and right brain hemispheres, by means of the *corpus callosum*. Then, SCI 2004 might be perceived as a **research corpus callosum**, trying to bridge analytically with synthetically oriented efforts, convergent with divergent thinkers and focused specialists with non-focused or multi-focused generalists

This is Section 1 in Chapter 3 of my following book draft;

Takeshi Utsumi  
Draft of Proposed Book  
"Electronic Global University System and Services"  
<http://tinyurl.com/27ykrf>

This is a slide show on the comparison of Eastern (polytheism) and Western (monotheism) cultures in relation with right and left hemispheres of brain and functions of analog, digital and hybrid computers.

Pls note its last slide on "Mathematical Expression of Religions and Cultures." It may be called "Utsumi's Equation" in comparison to Einstein's  $E=mc^2$  — my big joke!!

In the narration of the slide #8, I urged the construction of broadband global computer communication network between the two cultures, as the broader nerve fibers of corpus callosum between the two brain hemispheres, for attaining global peace as two hemispheres interact closely in normal human brain.

BTW, I also learned in an article that women have broader corpus callosum so that they are more talkative and hence more peaceful than men.

**Dear Rene:**

(7) Many thanks for your msgs (**ATTACHMENT I** and **II**).

Fouad is currently very busy with the creation of GUS/Palestine/Gaza Strip and West Bank.

I am sure he would reply to your inquiry as soon as he find his time.

Best, Tak

Dear Tak,

Thank you for the information on the up-coming conference in Egypt. It should be very interesting and a possibility to work with the Arab world.

I was wondering if you had news of Prof Fouad El-Harazin. I had contacted him following your correspondence concerning distance learning in the Gaza strip.

Given the current tensions in Gaza, I was wondering if you had news. It is hard to know from outside what impact on academic institutions the changes make. Sometimes a crisis will open a door as well as the more usual shutting.

With all best wishes, Rene Wadlow

Dear Tak,

With the fighting and the changes in Gaza, I wonder if you have news of the distance learning program there. I had written following your correspondence to the Director about the creation of possible programs especially on conflict resolution. I guess it is either too early or too late, but I have academic contacts going to Israel who are interested in distance ed and might be useful contacts. I do not know if anyone can get in or get out of Gaza these days so I would be glad for any news. Best wishes, Rene Wadlow
