

PROPOSAL
ON
UPGRADING AND UPLIFTING
OF
INFRASTRUCTURE AND SUPPORTING LOGISTIC,
INSTRUCTIONAL MATERIALS AND SPORTS
FACILITIES
TO
LAKSHMIPUR BELBICHABA PRIMARY SCHOOL OF
RAUTAHAT DISTRICT, NEPAL

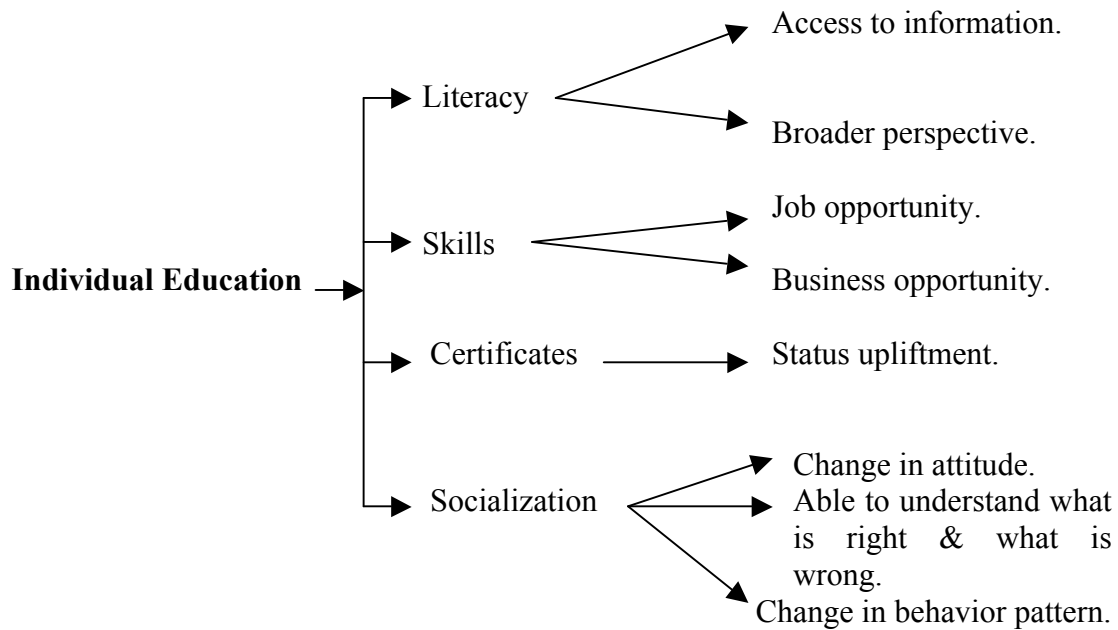

BACKGROUND

Social, cultural and economical development of a nation cannot be achieved unless and until proper Education is provided to her people. Education is the backbone, because it provides people the basic skills for future livelihood and income generation, through employment opportunity, business opportunity. Education should go through academics, life reality, and character building of children, norms, moral values, human approach and society as a whole. In our national context, we people of Nepal, till yesterday had ultimate goal of education and literacy to put our children to a circle of Doctor, Engineer, Pilot, etc. and that also for boys only, there were very little or no opportunity for girls to have access of education left the matter of providing opportunity for a higher education, but today we have crossed that barrier, though marginally. People become aware of the fact that, we have to provide the best possible opportunity for both boys and girls thanks to the media (air / print) and other factors. Now we are able to understand that it's human rights for girls to have education, fundamental freedom and equal access to basic social services. Proper education can bring peace and harmony, education can help to mobilize own inner energy to go for a better achievements.

Confusion exists regarding the goal of education, critiques show the fads, frills and fundamental assumptions:-

- a) The real fads: - “Hard” - Knowledge for Knowledge’s sake.
“Discipline” - Retributive concept of discipline.
e.g. - educational firm, objective test and movable desk.
- b) The real frills: - All aesthetic experiences above the minimum required for normal and emotional well being. All subjects that have no practical or fundamental value.
e.g. – music art, school lunch program, sports program.
- c) The real fundamental:-
 - Civil Competence (to assume)
 - Vocational Competence (skills)
 - Family Competence (home management, child care)
 - Personal Competence (Integrity, status, respect to others, self control, self guidance, and a moral philosophy, etc)e.g. - cultural knowledge, higher mathematics, multiple effects and individual education.

Thus, we can say that student should be provided the proper education facilities along with extra activity for fundamental growth of personality.

OBJECTIVES

Our country is one of the poorest country of the word by all the indicators of development. Though we are very rich of our social – cultural perspectives, the other indicators of development like, infrastructure, education and health shows lagging behind. People struggle for day to day livelihood can be seen every here and there. To develop our nation, we must be able to concentrate our self to have assess on our basics like education, health and infrastructure. To have proper education, we must have appropriate amount of fund for infrastructure setting, educational facilities and other supporting facilities like, sports, cultural program, study tour and other from of entertainment. Being a social animal we must have access for not only the education but other activities for development of our mind.

People who thinks that providing educational facilities to our children is the only duty means he is wrong in his approach, because for perfect growth of mind of a children we must taught them the social – cultural norms, values and ethics and must encourage them for adopting other hobbies like, playing with music, sports, and entertainment .

We, ISD-N being a social organization always have a vision that “Healthy Environment for Children: Shape the Future of Life”. We would like to adopt a path, which will help build a world fit for children through upholding our commitments of the following principles and the objective:-

- **Put children first:** Children should be given the priority above all.
- **Eradicate poverty, invest in children:** Investment in any other thing will be of no use unless our children are not getting education.

- **Leave no child behind:** Any children not getting the education is a violation of his/her human rights.
- **Care for every child:** Care means every thing for children like love, affection and mental satisfaction.
- **Educate every child:** Education does not means mere class education, it should be regarding formal and informal, about society and culture.
- **Protect the earth for children:** Environmental degradation, conflicts and war will not give benefit to anybody thus world should be protected from any type of misconception.
- **Support children by:** Providing them various facilities like, sports, entertainment and any other thing for their full growth as human being.

ABOUT LAKSHMIPUR BELBICHABA PRIMARY SCHOOL

The Lakshmipur Belbichaba School is situated at VDC- Lakshmipur Belbichaba of Rautahat district of Nepal, about 6 KM east from Gaur, head quarter of Rautahat district Ward No. 4. The school has been established in 2022 B.S on about 10 dhur of land. Six rooms in ground floor and a block has been constructed. In this school more than 200 students are studying. Total of 8 teachers & other supporting staffs are conducting the school. Due to lack of fund school does not have proper infrastructure and other facilities like toilet, drinking water, desk, bench, chair, board, etc. and other facilities like sports, cultural, Instructional Materials and entertainment. Hence ISD-N intends to support this school. Our basic objectives will be: -

- To support the school for upgrading of infrastructure along with construction of toilet (new) and other civil works including construction of drinking water supply system.
- Providing the logistic support (table & chair).
- Providing the logistic support (desk and bench).
- Providing the sports facility like Football, Volleyball, Table Tennis, Badminton, etc.
- Providing the school some stationary materials.
- Providing the School some Instructinal materials for child centred education.

IMPLEMENTATION STRATEGY

1. Our experts has visited the sites and found out the area where construction, repair & maintenance are needed. Now, ISD-N in association with District Education Office will upgrade the infrastructure including construction of drinking water system, toilet (new construction), and other infrastructure problems facing the school. We will provide the logistic support:
 - i. 50 sets of Desk & Bench.
 - ii. 10 sets of Table & Chair.
 - iii. 5 pcs. of Blackboard.
 - iv. 200 pkts. of Chalk & 30 pcs. Of Duster.
 - v. 2 pcs. of Bulletin Board.
 - vi. 1 piece of Wallboard for Daily News Paper.
2. We would like to provide the student some sports facilities. Like,
 - i. Football 5 nos. with other accessories.
 - ii. Volleyball 5 nos. with net and other accessories.

- iii. Basket Ball 2 sets with net and other accessories .
- iv. Table Tennis 5 sets with net and other accessories.
- v. Badminton 2 sets with net and other accessories.
- vi. Caramboard 5 sets with other accessories.
- vii. Ring 10 sets.
- viii. Chess 5 Sets.
- ix. Required Instructional Materials
- x. Stationary

ESTIMATED COST
