

# Brief Summary of T21

- What T21 does generally
- What is required before applying T21
- Contents of T21
- Why T21

# What T21 does generally

- Reproduce historical developments
- Generate base line scenarios
- Allow users to generate alternative scenarios
- Facilitate monitoring and evaluation

## What is required before applying T21:

- Identify major issues and users/clients
- Select home of the model which has the administrative and technical capacity
- Obtain financial resources needed
- Determine the time line of the project

# What should be included in T21

- Regular economic, social, and environment/resource sectors
- CC contents: begin with what we collectively believe are the major factors, with their linkages and consequences we know more clearly and can estimate their quantities

# T21 will be helpful:

- Identify key implications of CC
- Test the effects of different rates of CC
- Test mitigation/adaptation policies and their cost/benefit
- Increase CC awareness
- Coordinate efforts from different sectors, donors, and stakeholders
- Be maintained and updated locally as knowledge/data about CC improves and as new issues arise
